Notification to Adopt

The San Gabriel County Water District (SGCWD) is providing notification to our community members and stakeholders as we prepare to adopt our Hazard Mitigation Plan (The Plan). The Plan will help all of us be more resilient against natural hazards. We completed the Initial Draft Plan in early 2024 and are ready to proceed with the final adoption process on November 11, 2025.

What is a Hazard Mitigation Plan?

A Hazard Mitigation Plan is a framework that will guide SGCWD in making decisions and developing policies to reduce or eliminate risk to life and property. The plan identifies the types of hazards that threaten the service area, evaluates our vulnerability to those threats, and outlines a strategy to reduce or eliminate the risk posed by those threats. Whether retrofitting infrastructure or conducting other safety improvements, the Plan identifies a range of actions and projects that will help us avoid damage and recover quickly from hazard events.

Why is the Plan important?

The Disaster Mitigation Act of 2000 passed by Congress requires that all forms of local government maintain an approved Hazard Mitigation Plan to be eligible for and receive certain types of Federal Emergency Management Agency (FEMA) and other hazard mitigation funds. Receipt of these funds can be critical to the implementation of identified hazard mitigation programs that break the cycle of disaster, damage, restoration, and repeated damage.
